MAPLE LAMINATED BOARD

High-quality laminated boards used in our production ensure that the furniture will serve for many years, and their timeless colors will match any, even the most modern, interior.

WOOD

We specialize in wood processing. Selected wood used in our production, obtained in accordance with the requirements of the FSC certificate, makes the products to serve our customers for many years.

High quality

PLYWOOD

The high-quality plywood we use is characterized by high resistance to any mechanical damage. Covered with a colorless, safe water-based varnish, it gives the interior warm and unique character.

ABS

We use high-quality ABS edges to protect the edges of laminated furniture boards. This type of finish the aesthetic value of our products.

VARNISHES

In our production, we use ecological, safe, water-based varnishes in a wide range of colors. Varnishing takes place in a sterile varnishing chamber and a modern tunnel, thanks to which we obtain the perfect surface finish effect.

COLOR LAMINATED BOARD

Colorful fronts, shelves and table tops are of great interest to our customers. We chose a laminated, high-quality furniture board, the color range of which does not offend with its brightness and does not suppress other decorative elements.

VARNISHED MDF

Colorful, varnished furniture fronts provide many possibilities for arranging interiors for children. Their additional advantage is the aesthetically finished edges and the satin, pleasant to the touch surface.

SEWING

Threads – elastic polyester threads used for sewing seats, provide high resistance to mechanical damage, these threads are durable, stretchy and do not tear under pressure. The use of a double seam on the inside provides additional security. Wigofil – placed under the outer garment, prevents the cover from stretching under the influence of frequent use, it is light, soft, and breathable.

FOAM

The foam and seats are filled with polyurethane foam, the undoubted advantage of which is a high degree of durability and stability. Such foam is extremely resistant to pressure, and at the same time light and springy. The appropriate density of the VP 25/50 foam means proper stiffness, the seat does not collapse under the influence of weight, and is also soft to ensure comfort of use and carefree fun.

ACCESSORIES

The zipper tapes are secured with an additional sewing in the form of a tunnel, which guarantees safety of play without risk of getting caught on the protruding zipper.

Anti-slip – rubber lining in some foam fittings. It prevents the product from sliding on the slippery floor during play, preventing dangerous falls.

Labels with the logo – the hallmark of NOVUM foam fittings.

All fabrics used are oeko-tex certified.

is our priority!

FILLING

Appropriate filling of the seats with a mixture of polystyrene granules and sponge chewing (torn pieces of sponge) guarantees appropriate density and elasticity. The products do not crumble during use.

COVER

Meditap – pleasant to the touch, safe artificial leather, free of harmful substances, i.e. phthalates (compliant with the requirements of Oeko-tex Standard 100 and with applicable EU legal regulations). It is extremely durable and easy to clean – the resulting dirt can be removed using only water and soap. It comes in a wide range of beautiful, friendly colors.

YEARS

OF EXPERIENCE

Why should you trust NOVUM?

Many years of experience

We have been operating our factory since 1996 and we have gained extremely useful experience and skills in fabricating several types of materials

High quality of products

Materials used in our production are selected with care, thus quality of our products is under a strict control

Necessary certificates

Production materials used in our production, as well as the designed and built devices, have the necessary certificates and approvals

Individual approach

At every stage of the investment you can count on help and advice from our team members

Substantive support

We advise on both formal and technical issues for each project

Help in choosing devices

We help to suit the offer to the expectations, needs and capabilities of our customers

Service and warranty

We provide warranty and professional service

Design and visualization

We prepare professional projects and visualization of the entire investment

We equip the interiors of schools
and kindergartens

We create
spaces for
children
with
passion and
commitment

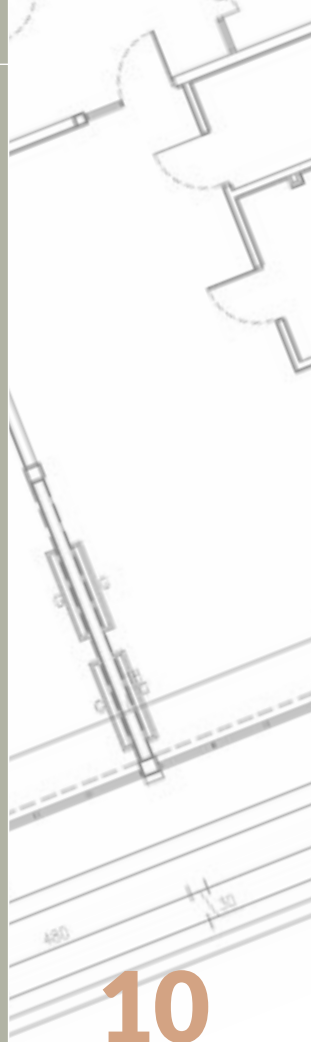

We have
experience
in large
projects

Furniture Sets

Furniture Sets

An extraordinary collection of furniture for children. Unusual shapes offer interesting arrangement possibilities and a well-thought-out design will make the interior unique. The right-left combination of cabinets will create the shape of a house and arranging them in the left-left or right-right system will magically turn the body into a mountain range!

DESIGN by:

Irregular shape of the table tops allows them to be combined into unusual figures. The whole is complemented by details in the form of round black handles and milling in doors and drawers, round openings in the backs of chairs and bars, which hide several applications.

TABLES

The table tops in the FLO collection are made of laminated chipboard, the edges are secured with 2 mm ABS.

Chameleon Cabinets

Chameleon cabinets are universal pieces of furniture that, depending on the customer's needs, can be used as an open bookcase, chest of drawers, closed cupboards or wardrobes. The furniture is made of maple-colored chipboard, and the drawers and doors are available in 4 colors, which allows customers to adjust the furniture to the colors of the kindergarten and school room.

Quiet

Hinges with a hydraulic cylinder, which tightens the door in the final phase of closing, make the door close silently and without a crack. Silent closing guides.

Durable

The furniture is made of 18 mm thick chipboard, the edges of the board are covered with 2-mm ABS which makes them smooth and safe.

Functional

Modules are available in 4 heights and widths. You can add shelves, drawers or doors to them, and you can buy a mattress for a low cabinet. Varied colors make them look great in any interior.

Furniture For Dividing Space

The line of furniture for dividing space helps in a practical way to separate functional room parts, thus making large rooms more cozy. Shelves with numerous compartments guarantee a lot of storage space.

Functional

Furniture for dividing space allows the separation of smaller corners in the rooms. Some modules stand on feet, whereas other are mounted on wheels, yet both are easy to move. This cabinet system is an extremely practical solution, especially for nurseries and kindergartens.

Durable

The furniture is made of 18 mm thick chipboard, the edge of the board is covered with 2-mm ABS which makes it smooth and safe. The acrylic mirror is glued with foil which guarantees safety.

Mobile

The combination of steel, rubber and plastic allowed to create strong, durable wheels. Thanks to the silent wheel bearings, maneuvering is easy and comfortable. The wheels withstand heavy loads and are equipped with solid brakes.

🔍 Body made of maple chipboard.

Partitions

The partitions system was created for the youngest users. Zigzags, mirrors, windows with colored plexiglass and various manipulations make the screens an attractive and functional element of nursery room and a favorite place for little children to play. By combining partitions with various manipulations, you can create an interesting space for play in various forms.

Combining two bookcases into one gives a functional piece of furniture with matching applications; mobile (thanks to mounted wheels); most important – very capacious.

Sofas, Poufs

Upholstered Furniture

- ① Skeleton base - high quality plywood
- ② Flexible and resilient, certified polyurethane foam with increased density
- ③ A fluffy polyester wadding with special blend of fibers
- ④ Wigofil - a layer between the materials - reduces tension of polyester wadding and fabric
- ⑤ Upholstery fabric
- ⑥ Skeleton made of chipboard

Feet (beech or metal) with felt tip to prevent floor damage

All fabrics used are oeko-tex certified.

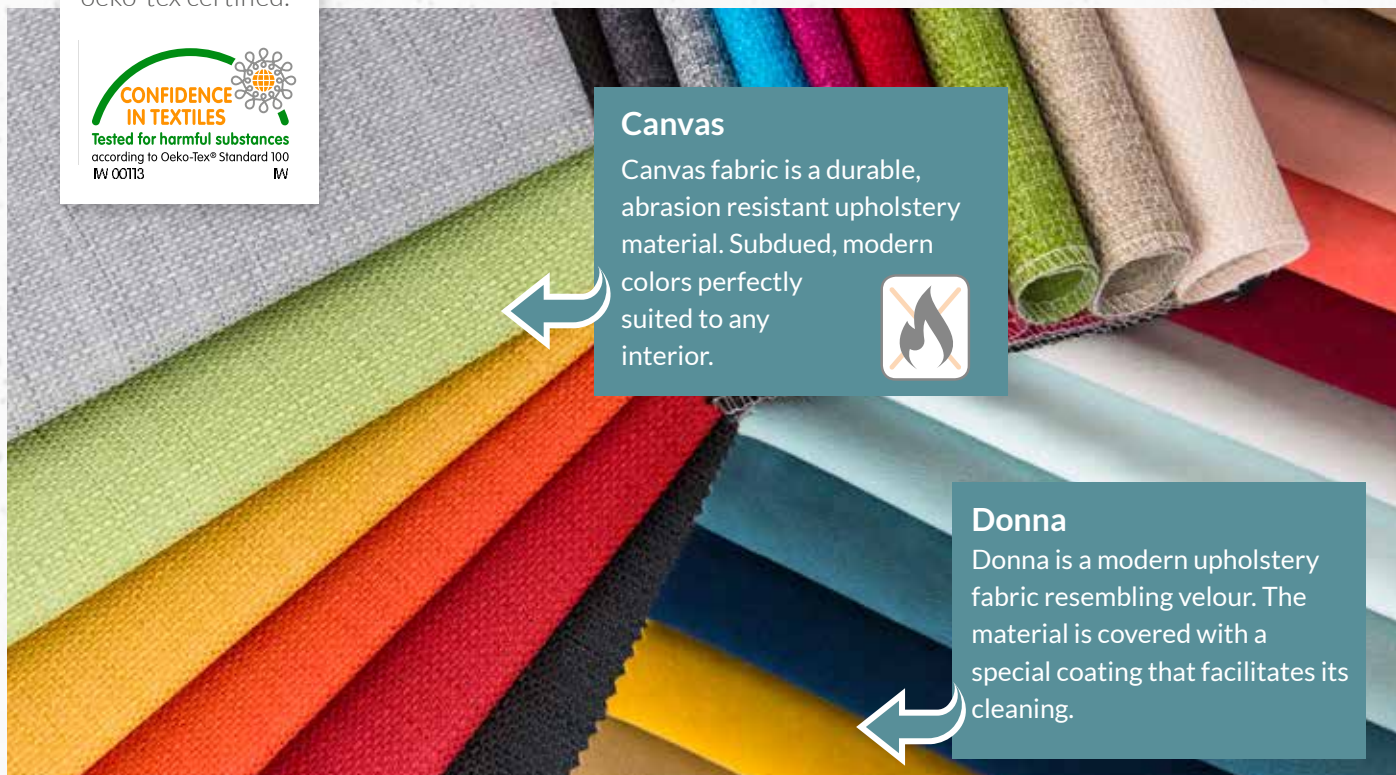

Canvas

Canvas fabric is a durable, abrasion resistant upholstery material. Subdued, modern colors perfectly suited to any interior.

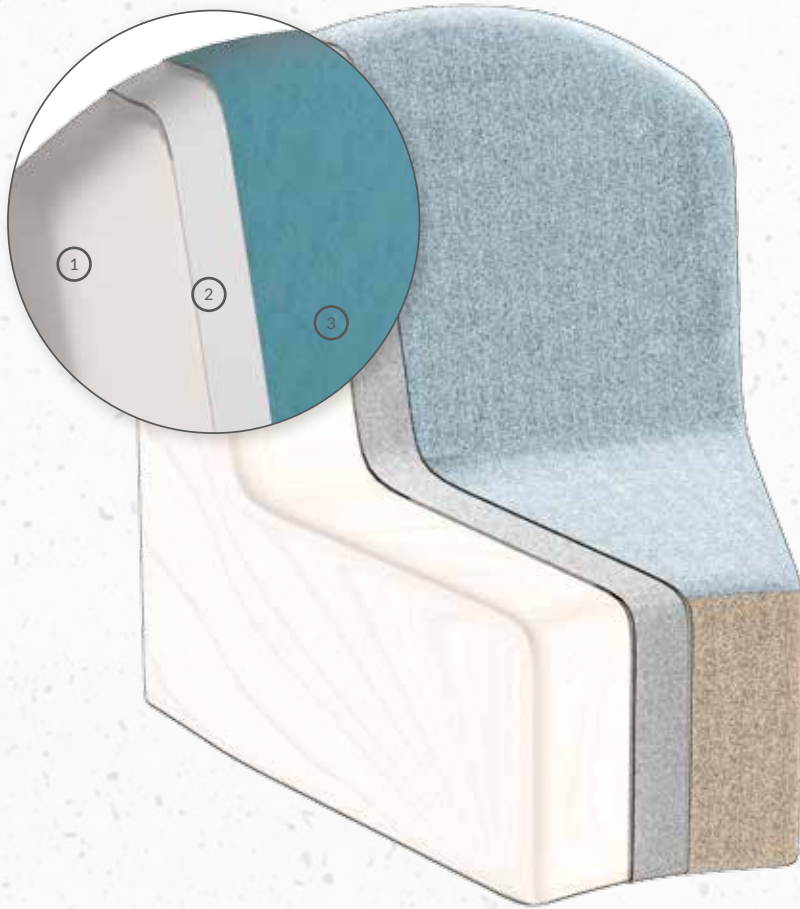

Donna

Donna is a modern upholstery fabric resembling velour. The material is covered with a special coating that facilitates its cleaning.

Soft Foams

- ① The filling is polyurethane foam with a density of 25 kg /m3 in accordance with the requirements of Oeko-Tex Standard 100.
- ② Wigofil - placed under the outer garment, prevents the cover from stretching under the influence of frequent use, it is light, soft, and breathable.
- ③ The cover is fabric MEDITAP B365 - leather-like material coated with PVC, in accordance with the requirements of Oeko-Tex Standard 100 class I and with EU regulations on the use of azo dyes and EN 71-3.

Sensorial Parachute

Lots of colourful elements and various shapes stimulate children's senses and push them to discover and play. The parachute is an innovative resource which supports children's sensorial development.

Sensorial Parachute
Dim.: dia. 2,5 m, 8 handles

4641473

Sensory path

The sensory path has been designed in order to develop the sense of touch and balance as well as to stimulate the centers of sight and hearing.

All 13 elements are different in texture, filling and foam hardness. The complete set creates a square, where individual bridges are connected by octagonal platforms in vivid colours.

All pieces can be combined with each other in any way. Elements are covered with artificial leather which is very easy to clean, while the non-slip surface makes the structure stable. Each article is available separately.

The set is available also in parts

non-slip bottom

easy to keep clean

4641564

Gymnastic Boxes

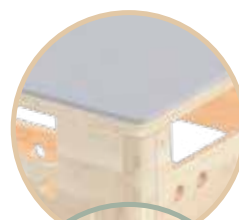

Each element can be used as a separate box.

The modular box consists of 4 elements. The height can be adjusted by removing the 2 middle pieces. Each box module, due to its design, can be used as a separate element. There are holes in the sides of the box to lock the benches. The width of the openings is adjusted to the width of the benches and is 41 and 66 cm respectively.

The top of gym boxes is covered with foam and trimmed with artificial leather

Gym boxes are made of birch plywood, corners of beech wood and rods of ash wood.

Handle on the side of the box makes the wheels hide or stick out to move the box easily.

Non-slip rubber at the bottom prevents from sliding during exercises.

Large gym box Active
Dim.: H. 104 x W. 98 x D. 98 cm

FURNITURE

I. Furniture usage instructions

1. The NOVUM Company's products should be used in accordance with their intended purpose.
2. The furniture should be used indoors to be protected from exposure to hazardous conditions. Recommended conditions are a temperature of 15-30 °C, humidity 40-65 %. The furniture should not be placed near heat sources; one should avoid its contact with water and direct sunlight.
3. Furniture assembly should be carried out in accordance with the attached assembly instructions
4. A proper levelling of furniture is required.
5. In order to move the furniture, one should remove its content, protect the movable parts (lift up to the transport). It is unacceptable to move the furniture directly on the floor.
6. One should inspect the furniture during usage and ensure that all connecting elements are tightened.
7. In order to ensure a proper operation of the amortization systems and the closing of drawers and fronts, one should close them with an appropriate force. Using too much force causes a limited functionality of the mechanisms, and such incidents, if occurring repeatedly, may lead to their damage.
8. Excessive load of furniture is unacceptable. Do not lean on or subject the furniture doors to excessive weight.
9. The drawer should be loaded evenly on the entire surface; one should not lean on it. In particular, one should avoid excessively loading the drawer near or by its front
10. The surface of the furniture should be protected from bruises and scratches; one should not expose it to sharp objects.
11. The maintenance should be performed only with furniture care products according to the instructions. During cleaning and maintenance of furniture one should use soft, dry or slightly moist fabrics as well as products intended for the maintenance of materials from which the furniture is made. Do not use unknown agents. Do not use aggressive cleaning agents and always read the producer's notes on the product.
12. The Manufacturer is not responsible for mechanical damage caused by improper use.
13. In case of any doubts concerning the usage of the furniture, before performing any action described in this instruction, please contact the Distributor or the Manufacturer.

II. Terms of warranty

1. The Manufacturer provides a two-year warranty on its products from the date of releasing the goods to the Purchaser.
2. The receipt of the product and lack of objections means that the Purchaser confirms the lack of physical defects of the delivered elements, whereas the Purchaser is obliged to exercise due diligence during receipt of the product and to report any noticed defects within fourteen days from the date of receipt.
3. The Contractor declares that the furniture does not contain physical defects and fulfills its intended function if it is used in normal conditions, in accordance with the intended use and preserving the basic principles outlined in the furniture usage instructions.

4. Colour and texture deviations of the wood or boards, which are the result of the technological process, are not considered as a defect.
5. If the Manufacturer finds the complaint justified, the warranty includes free repair or replacement of the product with a new one, free of defects. The Manufacturer shall choose the way of implementation of the rights under the warranty.
6. Where it becomes necessary to replace the goods or elements produced by using the materials that the Manufacturer no longer has in his offer, the Purchaser is obliged to select a substitute material or product at similar price from the current offer.
7. If there is a need to replace the elements or the entire product, a new warranty period (2 years) shall apply only to the replaced parts and shall be calculated from the date of its delivery.
8. The Purchaser shall lose the rights under the warranty if the furniture is used contrary to its purpose
9. In matters not covered by this warranty, the following shall apply: Directive 1999/44/EC of 25 May 1999 on certain aspects of the sale of consumer goods and associated guarantees, and the Acts of 27 July 2002 on special conditions of consumer sales and amendments to the Civil Code - Civil Code of the Republic of Poland.

III. Procedure in case of noticing any defects of goods

1. In case of noticing any defects of goods, the Purchaser shall immediately contact the Distributor in writing, whose duty is to verify the situation on the basis of the usage instructions and terms of warranty
2. The notification should include:
 - invoice or order number,
 - the Purchaser's data with an exact address, phone number and e-mail to the contact person,
 - the date of noticing the defect,
 - description of the defect,
 - photographic documentation of the noticed defect.
3. Upon receipt of the complaint, the Manufacturer / Distributor shall within 14 days perform one of the following actions:
 - accept the lodged complaint, arrange an appointment and deliver the defective part or product,
 - if any unclear matters arise, will ask for additional information and the decision on how the complaint will be considered shall be made after their expertise,
 - will not accept the complaint and will present a possible cost calculation for a paid delivery of the defective parts.
4. The Purchaser is obliged to cooperate with the Manufacturer / Distributor in handling the complaint and in particular in collecting and providing the information necessary to unambiguously determine the cause and extent of the defect.
5. The Distributor / Manufacturer may demand the return of the defective product in order to verify the lodged complaint.
6. The necessary costs associated with performing warranty repairs shall be borne by the Manufacturer / Distributor. If it is found that the complaint is unjustified, all costs shall be borne by the Purchaser

IV. Loss of privileges, disclaimer of warranties

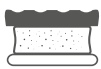

- The loss of warranty rights occurs in the event of an improper use of the product, particularly in the case of:
 - attempts to make repairs or alterations by persons unauthorized by the Manufacturer / Distributor,
 - using the furniture contrary to the intended usage,
 - improper climatic conditions,
 - improper maintenance and cleaning of the products e.g. by using improper agents for furniture care that contain substances that may affect the structure of the furniture,
 - damage caused by disassembling and reassembling the furniture set.
- The following shall not be considered a defect:
 - situations in which the product has been damaged due to improper adjustment of the door fronts and furniture drawers,
 - defects, damage and lack of elements and accessories that were visible and could be detected during the receipt of the goods but had not been reported,
 - defects and damage due to which the price of the product was reduced,
 - characteristics resulting from the type of the used materials, where small differences are not a defect of the product but arise from the specificity of those materials and their natural properties,
 - changes that occur naturally during an average (normal) use of the products,
 - mechanical and chemical damage, staining, discoloration, loss of color intensity caused by light,
 - creaking of products resulting from loose joints or other reasons,
 - other damage resulting from fortuitous events or other circumstances after the receipt of the goods
- The Contractor ensures that the material as well as the used technique and production technology will provide you with comfort in the use of the purchased goods for a long time, provided that you comply with the remarks contained in the warranty and the usage instructions.

FOAMS

I. Manual / characteristic

- The product is made of high quality Eco-leather – Meditap. The Meditap fabric is a phthalate-free material, consistent with the Oeko-Tex Standard 100 requirements, which meets the human-ecological requirements of the currently applicable standard of products for children.
- Method of maintaining the Meditap material (Eco-leather)

Allowed agents:			
Daily soils	Mild detergent, preferably a gray soap solution	Clean regularly with a sponge or soft cloth	In the end, wipe the cleaned spot with a moist cloth, then wipe dry (in order to remove any remains of the detergent)
Local heavy soils	25% solution of ethyl alcohol	Gently rub with a soaked gauze pad	
Disinfection	Generally available disinfectants	Disinfect according to the producer's notes on the agent	-
Warning! Before using an agent other than a mild detergent, check the effect on a hidden area of the product, and the cleaning itself should be performed carefully.			

Information	
	Clean with a sponge
	Do not wash!!! (fragile products)
	Do not bleach!!! (do not use chlorine releasing substances for bleaching)
	Do not iron!!! (keep away from hot surfaces i.e. radiator)
	Do not dry clean!!!

Do not use!!!	
Waxes	The use of these agents may cause hardening and cracking of the material, as well as changing the color and gloss of the product's surface
Sprays	
Strong detergents	
Products containing solvents	
Products for natural leather cleaning	
The Manufacturer does not recommend the use of cleaning agents for ecological leather (artificial leather)	

- The highest quality polyurethane foams with increased hardness VP 25/50 were used in the products, which results in a longer period of use (it has smaller permanent deformations). The foam manufacturer maintains the highest standards of environmental protection, health and safety
- Do not use sharp objects, tools – possibility of scratching, tearing up the fabric
- Do not bite, pull or throw.
- Products filled with granulate – in case of damage, there is a risk of choking on small parts
- Before using the product by children, remove all packing materials
- The Manufacturer is not responsible for the use of the product contrary to its intended purpose.

II. Terms of warranty

- The Manufacturer provides a two-year warranty on its products from the date of releasing the goods to the Purchaser.
- The receipt of the product and lack of objections means that the Purchaser confirms the lack of physical defects of the delivered elements, whereas the Purchaser is obliged to exercise due diligence during receipt of the product and to report any noticed defects within fourteen days from the date of receipt.
- The Contractor declares that the products do not contain physical defects and fulfills its intended function if it is used in normal conditions, in accordance with the intended use and preserving the basic principles outlined in the furniture usage instructions.
- Color and texture deviations of the wood or boards, which are the result of the technological process, are not considered as a defect.
- If the Manufacturer finds the complaint justified,

the warranty includes free repair or replacement of the product with a new one, free of defects. The Manufacturer shall choose the way of implementation of the rights under the warranty.

6. Where it becomes necessary to replace the goods or elements produced by using the materials that the Manufacturer no longer has in his offer, the Purchaser is obliged to select a substitute material or product at a similar price from the current offer.
7. If there is a need to replace the elements or the entire product, a new warranty period (2 years) shall apply only to the replaced parts and shall be calculated from the date of its delivery.
8. The Purchaser shall lose the rights under the warranty if the product is used contrary to its purpose.
9. In matters not covered by this warranty, the following shall apply: Directive 1999/44/EC of 25 May 1999 on certain aspects of the sale of consumer goods and associated guarantees, and the Acts of 27 July 2002 on special conditions of consumer sales and amendments to the Civil Code - Civil Code of the Republic of Poland.

III. Procedure in case of noticing any defects of goods

1. In case of noticing any defects of goods, the Purchaser shall immediately contact the Distributor in writing, whose duty is to verify the situation on the basis of the usage instructions and terms of warranty.
2. The notification should include:
 - invoice or order number,
 - the Purchaser's data with an exact address, phone number and e-mail to the contact person,
 - the date of noticing the defect,
 - description of the defect,
 - photographic documentation of the noticed defect.
3. Upon receipt of the complaint, the Manufacturer / Distributor shall within 14 days perform one of the following actions:
 - accept the lodged complaint, arrange an appointment and deliver the defective part or product,
 - if any unclear matters arise, will ask for additional information and the decision on how the complaint will be considered shall be made after their expertise,
 - will not accept the complaint and will present a possible cost calculation for a paid delivery of the defective parts.
4. The Purchaser is obliged to cooperate with the Manufacturer / Distributor in handling the complaint and in particular in collecting and providing the information necessary to unambiguously determine the cause and extent of the defect.
5. The Distributor / Manufacturer may demand the return of the defective product in order to verify the lodged complaint.
6. The necessary costs associated with performing warranty repairs shall be borne by the Manufacturer / Distributor. If it is found that the complaint is unjustified, all costs shall be borne by the Purchaser.

IV. Loss of privileges, disclaimer of warranties

The loss of warranty rights occurs in the event of an improper use of the product, particularly in the case of:

- attempts to make repairs or alterations by persons unauthorized by the Manufacturer / Distributor,
- using the product contrary to the intended usage,

- improper climatic conditions,
- improper maintenance and cleaning of the products e.g. by using improper agents for furniture care that contain substances that may affect the structure

The following shall not be considered as a defect:

- defects, damage and lack of elements and accessories that were visible and could be detected during the receipt of the goods but had not been reported,
- defects and damage due to which the price of the product was reduced,
- characteristics resulting from the type of the used materials, where small differences are not a defect of the product but arise from the specificity of those materials and their natural properties,
- changes that occur naturally during an average (normal) use of the products,
- mechanical and chemical damage, staining, discoloration, loss of color intensity caused by light,
- other damage resulting from fortuitous events or other circumstances after the receipt of the goods.

The Contractor ensures that the material as well as the used technique and production technology will provide you with comfort in the use of the purchased goods for a long time, provided that you comply with the remarks contained in the warranty and the usage instructions.

GYMNASTIC EQUIPMENT

I. Gymnastic equipment usage instructions

1. The NOVUM Company's products should be used in accordance with their intended purpose.
2. The gymnastic equipment should be used indoors to be protected from exposure to hazardous conditions. Recommended conditions are a temperature of 15-30 °C, humidity 40-65 %. The furniture should not be placed near heat sources; one should avoid its contact with water and direct sunlight.
3. Gymnastic equipment assembly should be carried out in accordance with the attached assembly instructions.
4. A proper leveling of equipment is required.
5. In order to move the product, one should remove its content, protect the movable parts (lift up to the transport). It is unacceptable to move the gymnastic equipment directly on the floor.
6. One should inspect the product during usage and ensure that all connecting elements are tightened.
7. Excessive load of the gymnastic equipment is unacceptable.
8. The surface of the product should be protected from bruises and scratches; one should not expose it to sharp objects.
9. The maintenance should be performed only with suitable care products according to the instructions. During cleaning and maintenance of products one should use soft, dry or slightly moist fabrics as well as products intended for the maintenance of materials from which the gymnastic equipment is made. Do not use unknown agents. Do not use aggressive cleaning agents and always read the producer's notes on the product.

10. The Manufacturer is not responsible for mechanical damage caused by improper use.
11. In case of any doubts concerning the usage of the furniture, before performing any action described in this instruction, please contact the Distributor or the Manufacturer.

II. Terms of warranty

1. The Manufacturer provides a two-year warranty on its products from the date of releasing the goods to the Purchaser.
2. The receipt of the product and lack of objections means that the Purchaser confirms the lack of physical defects of the delivered elements, whereas the Purchaser is obliged to exercise due diligence during receipt of the product and to report any noticed defects within fourteen days from the date of receipt.
3. The Contractor declares that the gymnastic equipment does not contain physical defects and fulfills its intended function if it is used in normal conditions, in accordance with the intended use and preserving the basic principles outlined in the furniture usage instructions.
